ANSH MANGLA

AI/ML Engineer

8287346252 • anshmangla3107@gmail.com • Portfolio • LinkedIn • GitHub

AI/ML Engineer with hands-on experience building Generative AI applications, including Agentic AI, RAG, LLM-powered document intelligence, and NLP pipelines. Proficient in Python, LangChain, LangGraph, and LLM frameworks. Experienced in developing scalable, production-ready AI solutions and deploying end-to-end applications with modern cloud technologies and infrastructure.

EDUCATION

Maharaja Agrasen Institute of Technology Aug 2022 - May 2026
Bachelor of Technology (Artificial Intelligence and Machine Learning) Cumulative GPA: 8.29

Delhi Public School, Rohini
CBSE – Grade XII (2022): 94.2% | Grade X (2020): 93.2%

WORK EXPERIENCE

AI Product Engineer Intern - Sodhani Capital **(Live)** *Jul 2026 – Present; Remote*

- Built Sodhani's scalable financial data platform, automating daily market data, corporate filings, and exchange feeds for 4,600+ companies across multiple financial sources using Node.js, TypeScript, PostgreSQL, and Python.
- Engineered an AI-driven fundamental analysis pipeline computing 50+ quantitative financial metrics and generating validated institutional equity research reports using Gemini; deployed services on Azure with HTTPS and Cloudflare caching.
- Developed an automated multi-year financial OCR pipeline using Chandra OCR to extract, normalize, and consolidate complex financial statements from annual reports into structured Excel, JSON, HTML, and Markdown outputs.

AI/ML Intern - ESRI India Tech Pvt. Ltd. *Aug 2025 – Sep 2025; Noida, Uttar Pradesh*

- Developed multi-source geospatial query agents integrating shapefiles, POI data, and crime/news datasets to generate actionable insights and interactive map visualizations for real-world analytical workflows and decision-making.
- Built AI-driven geospatial tools including Grad-CAM for satellite imagery, a 2,000+ PDF RAG-based document assistant, automated news location extraction, and an RFP analyzer for enterprise-scale geospatial intelligence use cases.

AI/ML Intern - Optimal Virtual Employee *Oct 2024 – Dec 2024; Noida, Uttar Pradesh*

- Developed an ML model for employee attrition prediction, achieving 94% accuracy on test data using Python.
- Built a real-time employee productivity dashboard using Python and React.js, reducing turnover costs and manual tracking time by 60%+ through automated workflows and real-time performance monitoring.

ACADEMIC PROJECTS

AI Sidekick (JARVIS-like Assistant) *Sep 2025*

- Built an agentic AI assistant using LangGraph and LangChain with 40+ integrated tools for browser automation, web search, file operations, and task orchestration across complex multi-step workflows and processes.
- Integrated multimodal voice and text interactions with human-in-the-loop validation and LLM evaluation.

Google Earth Engine Analytics Platform (UI | Backend) *June 2025*

- Dynamic generation of Google Earth Engine code through context-driven LLMs to answer complex environmental queries using live geospatial data and responsive interactive UI.
- Server-side execution of code and real-time data analysis using E2B Sandbox.

AI Automated Pitch Deck Parser *Feb 2025*

- Built an AI pitch deck parser using NLP/NER with 92% accuracy, cutting manual analysis time by 70%.
- Deployed Django web app with real-time reports and scorecards to scale start-up evaluations.

CERTIFICATIONS

Machine Learning Specialization (DeepLearning.AI / Stanford) | **AI Agents & MCP** (Udemy) | **Web Development** (Udemy)

TECHNICAL SKILLS

Languages & Scripting: Python, C++, SQL, JavaScript
AI/ML & Data Science: Pandas, Scikit-learn, TensorFlow, Hugging Face, OpenCV, LSTMs, NLP, Transformers, NER
GenAI & LLMs: LangChain, LangGraph, Ollama, FAISS, OpenAI API, Gemini API, Prompt Engineering, RAG, Whisper
Backend & Cloud: FastAPI, Flask, REST APIs, Node.js, PostgreSQL, Azure, Cloudflare, Git, GitHub
Languages: Fluent in English, Hindi; Elementary Proficiency in German
